Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwon in view of Zimmerman. Kwon discloses the claimed invention except for the ice cube compartments being diagonally arranged. Zimmerman teaches an ice tray having compartments that are diagonally arranged. It would be obvious to modify the ice tray of Kwon so that the ice compartments are diagonally arranged, in view of Zimmerman, for the purpose of providing more compartments on the tray. The shape of the compartments is considered to be a matter of obvious design choice to one of ordinary skill in the art, because crescent and oblong shapes per se are well known, and no criticality or unexpected results are seen or have been disclosed for the use of crescent or oblong shapes.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
